

BOOGIE

**She was sittin' there that night
Just looking bored of everything
Even though her longtime boyfriend
Just got her the number ten gold ring
She looked at her right side, turned to the left side
Then she closed her eyes right away
Then the stage lights turned on and there it was
The band was ready to play**

**"Oh band, would you please make me dance
And forget my damn day job
And if you promise me you'll keep on groovin'
Baby I promise you I'll never stop"**

**I know what you want
Get addicted to the boogie
I know what you need
Let your body move to the groove, yeah!
I know what you want
Get addicted to the boogie
I know what you need**

**She was shakin' and jumpin' and rollin' and stompin'
And dancing all over the floor
And they just kept on playin' and jammin' and swingin'
'Til the building couldn't take no more
So the walls started crackin' and the people
Cold sweatin' as the place was upside-down
But the lady she was diggin' it so they kept the promise
"Let's keep on gettin' on down" **Repeat Bridge & Chorus****
