

## **MUSIC**

**Music doesn't let you down because you're out of style  
Music doesn't ask you where you've been  
And it warms up all the flesh inside  
Baby believe me it's a stride  
It makes you see all those things in between**

***I got this music that will never cease  
To show me what i feel  
Music does not tell you what to do  
I've got this music that won't stop  
And baby believe me it's a lot  
Music comes from somewhere deep within***

**Music can move waves we cannot even see  
Sometimes can make you become  
Who you really wanna be  
If you wanna have power it'll give you that too  
But don't think you're a god just 'cause  
You can make somebody move  
It's true when they tell you music can make you grow  
But only if you're able to keep and feel the flow**

***I got this music that will never cease  
To show me what i feel  
Music does not tell you what to do  
I've got this music that won't stop  
And baby believe me it's a lot  
Music comes from somewhere deep within***

***I got this music that will never lie  
And makes me face the truth,  
Music shows a part that i cannot hide  
Music's what i need to help face the infinity  
Music comes from somewhere in the space***
