

# **RIGHT**

**I don't understand what u got baby  
Makes me do things i don't wanna do  
Leaving you might be crazy  
But it seems to me the only right thing to do**

**Better days will come but let me say "Thank U"  
U made me find wings i didn't know i had  
Loving you one more time girl  
Does not seem to me the very best way to end**

**The only right thing the only only right thing  
The only right thing the only only right thing**

**A week it's such a short time  
To live the past and get to a future  
So here's the present, with this i got to deal  
Baby now i got myself together  
I'll just keep on loving, yes,  
'cause it makes me feel so real**

**The only right thing the only only right thing  
The only right thing the only only right thing  
The only right thing the only only right thing  
The only right thing the only only right thing**
